Work Experience

Software Developer

Accreditation Canada @ Ottawa, Ontario

September, 2014 – present

- Created features and tools for Qmentum international, a VB.Net web Portal that is used to create surveys based on the HSO standards.
- Integrate our portal with Accreditate an ASP.net C# application to query clients' data and survey results in order to generate an evaluation of how a hospital measures up against the HSO standards.
- Used JS, jQuery, Css and HTML to refresh our existing application front end components to match the latest UX specs.
- Worked on multiple features to ease the process of creating a survey such as; survey template selector, HSO pre-packaged standards drag and drop component and worked with a senior architect to create multiple web APIs to generate dynamic reports.
- Followed the google material design guidelines to create an engaging user experience using AngularJS HTML/HTML5, bootstrap and Sass.
- Designed, and implemented an IOS offline mode to allow customers to take surveys without a connection.
- Using SSRS developed complex reports to integrated in the portal for our clients.
- Used Git, TFSs, Stash, Confluence Bamboo for code management and continuous integration.
- Did an agile training course, educated the team and did a presentation about the Agile best practices.
- Handled multiple priorities and deadlines while maintaining attention to detail.
- Taught myself and used Angular 2 to develop a prototype grid component that replaces our existing grid.

Analyst/Software Developer

The Department of Canadian Heritage @ Gatineau, Quebec

January, 2013 – March, 2014

- Identified and gathered missing GCBO Business Requirements from clients during the project design phase.
- Created design specifications to meet business requirements, following the PCH Gs & Cs architecture.
- Created reports with SQL Server Reporting Services.
- Converted existing Crystal reports version 11 to SQL Server Reporting Services.
- Performed unit testing of the GCBO application.
- Refactored the application code NET VB to simplify the architecture and increase performance.

Technical Analyst

IBM @ Ottawa, Ontario

September, 2010 – December, 2011

- Assisted clients with issues related to Cognos 8/10 BI software.
- Developed good understanding of the third party software environments supported by Cognos BI, such as, SQL Server, Oracle Database, Internet Browsers, etc.
- Created Test Cases and collaborated with the software development team to fix bugs (defects) and include additional features in the Cognos BI software.
- Developed critical and analytical thinking, as most of the issues presented by the clients were challenging and required quick resolution.
- Demonstrated excellent oral and written communication skills by communicating with clients via email and telephone daily
